

# FreeTraders eXchange

---

---

Interstellar Trading Network (FTX-ITN)<sup>®</sup>

---

## Executive Summary

---

FreeTraders Exchange is a trading entity operated by the International Order of Freedom. FreeTraders began operation in 2003 over the internet backbone with members worldwide.

Exchange of assets occurs on the FreeTraders eXchange Interstellar Trading Network. Each member's identity on the network is denoted as a "star". This permits exchange of assets of value to occur virtually between members "in the cloud", or "interstellar".

### Organization Values

International Order of Freedom (IOOF) believes in freedom to pursue economic transactions without governmental interference. We believe in Free Trade.

IOOF is a shelter sanctuary for any individual or organization seeking to exercise their rights to free economic pursuit. We promote and defend individual sovereign rights, economic liberty, and a free society that is mindful of charity for the less fortunate, and for all those in need.

***We are dedicated to building a free and competitive economic system based on the unrestricted exchange of goods, services and intellectual property.***

### FreeTraders Service

FreeTraders service is a decentralized platform designed to enable exchange of *any* legal asset of value between members of IOOF. An immediate goal is to align with strategic partners who will help integrate FreeTraders on the Stellar network utilizing blockchain technologies. The evolving service will be built to enable users to exchange value for value... securely, privately and reliably.

## Key Features and Specifications

- Fast, reliable and secure
- Encrypted, private transactions
- Anonymity using trade names
- Blockchain system with transactional metadata
- Selective disclosure of metadata- shared by user consent
- Distributed database/ledger on a peer-to-peer decentralized consensus network
- Encrypted assets, transaction data, user balances, and member profiles
- Smart contracts specifying terms of asset exchanges
- Secured Interstellar Communications

## What IOOF Offers

- ✓ Worldwide network utilizing blockchain technology operating on the FreeTraders eXchange Interstellar Trading Network <sup>(sm)</sup>
- ✓ Value for value exchange of goods, services, information and currencies
- ✓ Low-cost trading between members
- ✓ Stable, proprietary currency
- ✓ Secure communications
- ✓ Privacy and anonymity
- ✓ Protection from governmental interference
- ✓ Consensus agreement to guiding principles of trust, honesty and fairness
- ✓ Free exchange of information and ideals
- ✓ The ability to offer information as value
- ✓ Micro transactions

- ✓ Economic freedom
- ✓ A stable financial future
- ✓ A Shelter Sanctuary for all who value it
- ✓ **CHARITABLE PURPOSE TO BENEFIT THOSE IN NEED**

## What IOOF Needs

IOOF needs partners, collaborators and members who will adopt our principles and work to meet our goals.

## Collaborators and Partnerships

- Network Development Team- write network technical specs, integrate Interstellar Trading Network, serve as technical staff providing technical support.\*
- Software Development Team- optimize FreeTraders exchange software platform, test, debug, finalize and provide support. Develop smart contract integration and support. Develop future apps. Collaborate with operations center and other contributors.

\* Stellar.org or affiliates are preferred partners due to their networking technologies and charitable interest. We will work to integrate the Stellar network and the FreeTraders Exchange to form the first generation of the blockchain version of the Interstellar Trading Network.

- Financial Partner to act as a repository known as THE BANC.  
Accept IOOF donations in member currency.  
Exchange fiat to crypto, crypto to fiat.  
Provide cold storage of crypto deposits in secure, distributed locations across the network.  
Assets are stored and managed on the network. (The metadata will be aggregated in a secure distributed repository)
- FreeTraders Exchange Operation Center.  
Implement & support all FreeTraders Exchange operations.  
Collaborate with software development team and other contributors.  
Provide member services and member support.

## Value for Value

IOOF has been endowed through experience with sound guidance to pursue fairness, honesty and trust with members and partners. Members collectively and fairly cooperate together to meet the organization's needs and goals. We welcome all to join our ranks for mutual benefits. We believe everyone has something of value to offer. Members exchange value for value.

## Incentives

IOOF offers financial incentives to collaborators who will partner with us. The ITN network will be built on a gradual, but progressive timeline. New memberships will be suspended until such time as there is a cohesive working technology that can deliver secure and reliable services to members.

The target date for going live with a fully integrated blockchain networking technology is **05.04.2019**.

If you feel inspired to inquire further into the possibilities of collaborating on this project, please see more information:
